

TIC Kit

Torque Inserts Correctly Kit

Making Chips? You need the TIC Kit!

The "TIC Kit" will eliminate the problems associated with overtightened or loose tool insert screws!

The TIC Kit comes with a torque limiting screwdriver marked with the correct torque for each size of Torx screw used in toolholders, Torx bits for each of the screw sizes (T6, T7, T8, T9, T10), all contained in a custom molded plastic case. To use the TIC Kit, simply adjust the screwdriver to the size Torx screw to be tightened, insert the Torx bit from the kit, and tighten the screw. When the correct torque is reached, the clutch will index and no greater torque will be applied to the screw, even if the operator keeps turning the screwdriver!

The TIC Kit will eliminate the expense and problems of buying and keeping track of multiple keys and T-handles, as well as the problems associated with their inability to assure the correct torque.

The screwdriver in the TIC Kit is accurate to +/- 6% of the indicated T value, and is calibrated in our ISO/IEC 17025 Accredited Calibration Laboratory. It even comes with a FREE NIST-traceable calibration certificate!

It's time to stop drilling out toolholder screws and breaking expensive insert bits! The TIC Kit will increase your uptime and profits!

Part No.	Description
810581	TIC Kit w/TIC screwdriver, 1 each bits T6 – T10, case
810582	TIC screwdriver only
816771	T6 bits, pack of 5
816772	T7 bits, pack of 5
816773	T8 bits, pack of 5
816774	T9 bits, pack of 5
816775	T10 bits, pack of 5
816776	Bits, pack, 1 ea. T6 – T10

Increase your cutting tool and tool holder life!
